VISION

- 1 Uiseong Garlic Ham Camp with customers
- 2 Lotte Daycare Center
- 3 Volunteering to deliver briquettes
- 4 Proclamation ceremony for cultivating a creative labor-management culture

**Increasing value by sharing,
Lotte Foods strives to create value for
society through corporate activities.**

Growth with local societies

Lotte Foods is practicing Creating Shared Value (CSV) for win-win growth. We strive to create shared value while also carrying out a variety of social contribution activities for the communities. Uiseong Garlic Ham with added premium garlic, the local specialty of Uiseong (Gyeongbuk), and Muan Onion Ham made with onions which is the local specialty of Muan (Jeonnam) are ideal products created based on win-win growth with farmers.

Happiness at home

Happy employees create high quality products. Lotte Foods is constantly endeavoring to bring happiness to the homes of employees. In 2013, Lotte Foods became the first comprehensive food company to receive the Family-friendly Company award from the Ministry of Gender Equality and Family. We fully implemented the mandatory child-care leave system in September 2012 for the first time among Korean conglomerates. We are operating the Lotte Daycare Center for employees to devote themselves to work without needing to worry about childcare.

Business transparency and healthy company

Honesty and fairness are the most fundamental principles of Lotte Foods. By coexisting with partners, we create a perpetually growing corporate culture. We adopted the CP(Compliance Program) for fair trade in order to comply with the regulations related to fair trade and fulfillment of transparent management.

Lotte Foods is a company that boasts of a wide range of foods, which was molded through the merging of Lotte SamKang, Lotte Ham, Pasteur, and Lotte Fresh Delica. Our storied company has grown to become the leader in the food industry through a ceaseless commitment to innovation since first starting out in the edible oil and fat business in 1958.

Lotte Foods was the first to bring margarine to the Korean market in 1960, which enriched the kitchen tables of everyday Koreans. Our next foray saw us awaken Koreans to the pleasure of new taste sensations by mass-producing high-quality ice cream named "SamKang Ice cream" through the implementation of Korea's first hygienic production facilities in 1962. In 1987, the company leveraged its momentum behind the creation of a new standard for premium milk by launching pasteurized milk for the first time in Korea.

With regards to the oil & fat sector, Lotte Foods maintains its lofty seat at the top of the industry in Korea through its unparalleled technology. The processed meat sector is also no exception. With Lotte Ham and enNature, we offer up flavorful and high-quality products such as Lotte Vienna, Uiseong Garlic Ham, Rose Farm, and Kisstick. Lotte Foods also provides ice cream lovers with sweet bliss by rolling out premium ice cream selections like Papico, Crunch (Daeji) Bar, Red Bean Flavored Ice (Amatna) Bar, and Googoo Cone. Recently, Lotte Foods

has been expanding its market reach to include ice dessert products, launching variations that lead trend movements such as Macaroon Ice Cream and Greek Yogurt Cone. Pasteur aims to provide the best dairy products such as non-antibiotic milk from certified farms offering high-quality pasteurized milk, baby formula "With Mom" that is rich in lactic acid bacteria and vegetable DHA, and fermented yogurt that is sourced from 100% milk. In 2014, Pasteur established "Lotte-Nestle Korea" as a means to launch the coffee mix business through the multinational food and beverage company Nestle, and it is now independently engaged in the brewed coffee business.

With the goal of forging a rich food culture with savory foods based on integrity, Lotte Foods is constantly committed to providing enhanced products and services for consumers who always expect the best. The collective mindset of our company is fully immersed in the management of food safety, by making unsparing investments to technical development and upgraded facilities, while obtaining certifications such as HACCP and FSSC 22000.

Lotte Foods will tirelessly endeavor to become the best and more trustworthy food company in Korea through incessant pursuit of innovation and product development to uphold its status as a trend leader in the food business. Thank you.

CEO Yeong-ho Lee

From high-quality corporate B2B products to customized food ingredients for local restaurants
From the first food in a baby's life to health functional food for good health in old age
From slow-cooked, home-style side dishes to freshly preserved and quickly delivered convenience foods

Oils & Fats / Food Additives

Oils & Fats

The Korean history of processed oils and fats is parallel to the history of Lotte Foods. Lotte Foods is the first in Korea to develop margarine and fats for chocolate. We produce world-class products based on our leading technological skills.

No.1 in the Korean oil & fat industry, 60-year history of Oils & Fats in Korea

World-class products and technological skills

Operating the solutions team led by a master craftsman and a professional chef

In 1986, we established the BETERA (Baker's Terrestrial) and have begun operating the Solutions Team in 2015 to better communicate with our customers.

Korea's most diverse variety of goods, most innovative production of customized goods

We are engaged in partnerships with Korea's leading brands, and we help our clients succeed in business through providing customized goods that meet the needs of customers.

Food Additives

Lotte Foods supplies food additives and functional ingredients that form the basis of the food industry. Starting out in 1978 as a food additive business (Hanil Spice), we have produced a variety of food ingredients such as processed foods, chocolate-coated goods, seasoning and nuts, mostly focusing on food additives such as flavoring agents, food coloring, natural vanilla flavor, food additives, spices, and stabilizers.

State-of-the-art seasoning line that adheres to global standards

The Ansan Factory of Lotte Foods provides seasoning for major products in various fields of the food business with state-of-the-art facilities that meet global standards.

Korea's only natural vanilla flavor extraction technology and spices and seasonings for a variety of products

The natural vanilla flavor directly extracted from top-quality Madagascar vanilla beans is used as a core ingredient for various foods such as ice cream.

World-class chocolate coating technology

With top-tier facilities and technology, we produce Chocolate Sunflower Seeds and Stone Age Chocolate, as well as chocolate used in ice cream or toppings of frozen desserts, as well as premium almonds, blueberries and coffee chocolates for coffee shops.

Processed Meat

Processed Meat

Over the past 40 years, Lotte Ham has developed innumerable hit products that risen to become market leaders, such as Rose Farm, Lotte Vienna, Ddeokgalbi, Kisstick and Uiseong Garlic Ham.

Received the Best Product Award by Women for 6 consecutive years, and the Brand of the Year for 7 consecutive years

Meat

We provide high-quality and reliable products for customers by operating an integrated management system that oversees everything from the handling of materials to processing, distribution and sales.

Facilities in Gimcheon, which were selected as a leading facility by the Ministry of Agriculture, Food and Rural Affairs in 2012 as part of their measures to enhance competitiveness in the butchery industry.

Win-win local brand made by adding renowned Uiseong garlic to Korea-produced pork Uiseong Garlic Ham.	
Healthy and delicious premium ham, enNature.	
Canned ham purely made using domestic technology, Rose Farm.	
A tasty snack for youth, Kisstick.	
Cherished by the whole nation for over 30 years, Lotte Vienna.	
'Porkwell' boasting of health and quality.	
A win-win brand with Uiseong-gun 'Uiseong Garlic Pork'.	
'Premium Pork A1' that carefully selects and only uses Grade 1 sows.	
Retail brands 'Jinsim Korean Pork', 'Jinsim Korean Beef'.	

Dairy

In 1987, Pasteur Milk introduced pasteurized milk for the first time in Korea, setting a new standard for premium milk. Striving to promote national health through fermented milk, powdered milk and health functional food, Pasteur Milk is spreading out to the world beyond Korea, widely acknowledged for its outstanding quality.

Premium pasteurized milk made with precious raw milk

Pasteur Milk was the first in Korea to introduce the 63°C, 30-minute pasteurization method which is widely adopted in countries possessing advanced daily technology. To this end, Pasteur Milk manages raw milk with a stricter standard (8,000/ml) than Class I Raw Milk A (less than 30,000/ml). Pasteur Milk offers a fresh taste that brings you close to nature by minimizing thermal denaturalization through pasteurization.

Pasteur sets the standard for dairy products

We are the first in Asia to be qualified as a supplier of fresh milk to the U.S. Army, and the first dairy company in Korea to simultaneously obtain HACCP and GMP (Good Manufacturing Practices) from China, which have all led us toward catering to the world beyond Korea.

Fermented milk Quebyeon specialized for intestinal health.

Benecol certified by the Ministry of Food and Drug Safety to reduce cholesterol.

With Mom made through the MSD method that minimizes thermal denaturalization of nutrients and international-patented mother's milk lactic acid bacteria.

Yogurt made by fermenting 100% milk into lactic acid bacteria.

Ice Cream

Starting with Korea's first ice cream SamKang Ice cream in 1962, Lotte Foods has forged the history of ice cream by launching Red bean ice bar (Amatna) in 1972 and Korea's symbolic tube-based ice cream Papico in 1981. Our key products such as Papico, Googoo Cone, and Crunch (Daeji) Bar are consistently revered by our customers.

Infrastructure that leads the history of ice cream

By collaborating with the Lotte R&D Center, we are developing high-quality products and actively conducting research. In particular, our soft ice cream was made with Pasteur's organic milk and milk cream, providing a genuinely rich taste of milk.

Cheonan Factory, Korea's best and biggest ice cream production hub

Cheonan Factory is Earlier on, it established a product record management system, and obtained ISO9001, ISO14001, HACCP and certification of Children's Preferred Foods, insisting on strict standards for quality management.

Leading the latest trends in ice cream

Lotte Foods constantly endeavors to create new savory tastes that range from cool ice cream to premium ice desserts, such as Macaroon Ice Cream, Milk Bingsu Seoul (Snow), Cookie O, and the soft ice cream brand Snoble.

Premium ice desserts, La Best

The soft ice cream brand Snoble

Food Service

Lotte Foods provides premium food services combined with dining culture trend based on 35 years of accumulated technical skills and knowhow.

Menu consulting and R&D service

Professional chefs research and develop new menus and standardize them, helping clients succeed in business.

Manufacturing customized products in the best interests of consumers

Lotte Foods supplies more than 3,000 kinds of food ingredients that are suited to customer needs such as sauces, noodles and processed agricultural goods to food stores, catering service providers, restaurant chains and diners. We also develop and provide customized goods and products demanded by the clients by cooperating with Lotte R&D Center and managing plants equipped with state-of-the-art facilities.

Quality and sanitary control system, and integrated procurement sourcing competency

Lotte Foods is building efficient distribution systems and quality-based, independent purchasing channels based on the infrastructure and know-how of Lotte, Korea's biggest distributor.

Institutional food service and catering business

Lotte Foods provides customized premium institutional food and catering services that are suited to individual business characteristics, tastes and health based on scientific customer preference surveys.

Food

Premium food brand Chefood

Chefood is a premium food brand by Lotte Foods. Professionally cooked spaghetti, home meal replacements, high-quality cooking oils and dressings provided by Chefood enrich our meals and make cooking more convenient while upholding taste.

Leading a sophisticated food culture with Home Meal Replacements (HMR)

Lotte Foods offers a variety of choices for the individual tastes of each consumer, from RTH (Ready To Heat) products that just need to be heated to RTC (Ready To Cook) products that can be cooked easily. Lotte Foods takes the initiative in opening up the HMR market by developing à la carte dishes, noodles, frozen rice, and desserts to cater to consumers with different lifestyles.

Manufacturing and supplying retail brand products with top-class facilities and quality control methods

Lotte Foods directly manufactures and supplies various types of products based on food manufacturing know-how for each distribution channel such as supermarkets, convenience stores and department stores. Also, Lotte Foods leads trends by presenting products that are ideal for the Meal Solution food market based on scientific and systematic R&D in cooperation with Lotte R&D Center.

Delica / Brewed Coffee

Delica

We provide you with simple Delica and special meals with our utmost sincerity. Producing instant foods such as packed foods, samgak gimbap (triangular rice balls rolled in dried seaweed), and hamburgers, Delica provides fresh and tasty products that are perfect for the tastes and lifestyles of busy modern people.

Premium rice made by a rice sommelier

We use 100% high-quality, domestically harvested rice, delivering on the day of milling and used within 3 days. We also employ a so-called 'rice sommelier', who is tasked with the supervision of the entire process of cooking rice.

First in Korea to implement rice pressure cooker and cooking surface equipment to ensure the quality of specialized Japanese noodle restaurants

We willingly invest in facilities and technologies to improve quality. We implemented Korea's first rice pressure cooker and cooking surface equipment to manufacture top-quality products.

Signed a technical agreement with Warabeya, Japan

In 1999, we signed a technical agreement with Fuji Food, a specialized instant food company in Japan; and since 2013, we have entered into a technical agreement with Warabeya, another Japanese instant food company, to receive technology transfers every month for quality improvement.

We are manufacturing and supplying goods on the same day by establishing a same-day distribution system to promptly deliver fresh and tasty foods.

Brewed Coffee

Lotte Foods is endeavoring to deliver the naturally deep and rich flavor of brewed coffee by roasting strictly selected coffee beans using a world-class roasting technique.

World-class roasting machines and packaging equipment

We are able to provide high-quality brewed coffee products by entering into a technical partnership with UCC (Japan) for brewed coffee manufacturing. In addition to this, we are improving the quality of various brewed coffee products by obtaining certifications such as HACCP and FSSC22000 to guarantee the safety and cleanliness of products, and certification for organic agricultural products that promise high quality.
